Introduction to Coding with Python and SQL

RYAN BLUNDEN

Who am I?

Web, Mobile, Back-End and DevOps. And now international instructor.

Bringing my 15 years of experience in Engineering and Ops to help companies of all sizes all over the world.

Meet your mate!

1. Name?

2. What are they currently working on?

3. What do they want to get out of this course?

What is my job?

What is my job?

To help you win at learning how to code.

```
▸ What does it really mean to be a coder?
▸ Give you real and production quality code samples.
▸ Provide next steps for your coding journey.
```

What is your job?

To win at learning how to code.

```
‣ Actively Learn.
‣ Fully Engage
‣ Own Your Outcomes For This Workshop.
‣ Signal If You're Lost.
‣ Contribute.
‣ Check-In With Those Around You To See If They Need Help.
```
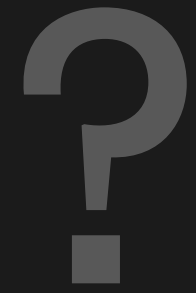

Getting code "to work" is relatively easy.

Writing quality code is a lifelong journey.
